PROFILE

Data Analyst & Customer Success specialist with 3+ years of experience turning user needs into actionable insights and reporting for 7+ clients monthly. Skilled in SQL (MySQL/PostgreSQL), BI tools (Looker Studio, Apache Superset), Python, and Google Sheets, with a strong track record in client reporting, bug tracking, user adoption analysis, and stakeholder communication. Managed up to 10 clients at once, maintained 5/5 satisfaction ratings, and supported >70% month-over-month retention growth. Seeking remote opportunities with international teams to deliver data-driven impact and support business growth.

WORK EXPERIENCE

Data Analyst Customer Success	2023 - Present
- Simultaneously delivered data reporting services to a diverse client base of more than 7 clients every month - Developed and executed a user activation plan, resulting in a remarkable user adoption rate >90% and monthly user retention rates >70% - Regularly monitored user activities, generating insightful user behavior reports and content strategies on a weekly, monthly, quarterly, and annual basis. These reports played a crucial role in identifying user needs and maintaining robust in-app traffic. - Acted as a customer success partner by supporting clients in addressing bug-related issues and unique use cases. Provided timely, data-driven solutions and ad-hoc reports on a daily basis to ensure seamless client experience and operational continuity. - Client Assigned: Biofarma, BNI, BSI, Sampoerna, Danamas, Privy, Mitsubishi Corporation, Intikom, KCSI, etc - Supporting tools: Redash for SQL data query, Apache Superset & Looker Studio for analytics tools, Python & Google Sheets for data exploratory and finding insights, Google Slide for creating presentation deck
